

Name Eri Toyoda

IJCC Position: Director

From: Tokyo, Japan

Industry: Manufacturing (Manufacturer of custom molds for precast concrete products)

About: I graduated from National University of Ireland, Galway in 2014 and I've been working at Toyota Forms Japan (the manufacturer of the custom molds for precast concrete products) since 2015. Our head office is located in Tokyo, and we have 3 factories, one in Fukushima, one in Saga and one in Ahmedabad, Gujarat, India. We're a 57 year-old company and we've exported our molds to 20 countries so far, but not yet to Ireland!

As a Japanese person who lived in Ireland for 4 years, I do love Ireland and the Irish people.

I'm very looking forward to contributing to facilitate the communications between Ireland and Japan further!
